

Product Benefits

J-DRain – Sheet Drains

1. Protects waterproofing / damproofing

High strength core protects water proofing from damage during backfilling and freeze/thaw periods

Enhances performance of waterproofing system

2. Rapidly lowers hydrostatic head pressure from wall or structure

Filter fabric permits water to enter dimpled core spacing while restraining soil particles

Quickly transports water away from wall and down to the collection system at base of wall

Lowers water pressure level on wall; water falls after passing thru the filter fabric

3. Easy to install

Lightweight, easy to handle rolls

Requires no heavy equipment

4. Predictable performance

Excellent flow rate performance with most soil types

Tested per ASTM standards
