

NOTES:

Stakes shall be made of material with sufficient strength to support and anchor the EnviroGrid sections. A standard J-Hook stake is made from construction rebar, 10 mm or 12 mm (0.375 in or 0.500 in) in diameter and length sized according to this drawing or engineered specifications.

ENVIROGRID provides this information only as an accommodation to our customers. No warranty or other representation regarding the suitability of the above application procedure is made due to the fact that each installation has specific requirements that may not have been considered in this generalized procedure. ENVIROGRID makes no warranties or representations regarding the suitability of its ENVIROGRID products for specific uses or applications. Our liability is limited to furnishing, without charge, a replacement for any ENVIROGRID section that is proven defective under normal use or service.
