Knitted Geogrid

STRATAGRID is geogrid reinforcement for soil. These high performance geogrids are constructed of high molecular weight and high tenacity polyester yarns utilizing a complex knitting process and low temperature coating technology to provide superior engineering properties. Yarns are precision knitted into a dimensionally stable, uniform network of apertures providing significant tensile reinforcement capacity. STRATAGRID is engineered to be mechanically and chemically durable, in both the harsh construction installation phase and in aggressive soil environments (pH range from 2-10). A proprietary UV stabilized coating provides further chemical and mechanical benefits.

PROPERTY	TEST METHOD	ENGLISH	METRIC
Ultimate Strength Creep Limited Strength Long Term Design Strength (LTDS)	ASTM D-6637 METHOD A	3600 lbs/ft	52.5 kN/m
